

SATYAM SINGH RAJPUT

AI SYSTEMS OPERATOR & STRATEGIC ANALYST · MULTI-AGENT DAGS & PRODUCTION EVALS

Pune, Maharashtra, India | +91 9730153661 | satyam25613@gmail.com | [Portfolio Showcase](#) | [LinkedIn](#) | [GitHub](#)

EXECUTIVE SUMMARY & SYSTEMS MANDATE

Technical Operator and Systems Strategist specializing in autonomous multi-agent orchestration, Model Context Protocol (MCP) tool routing, and production LLM evaluation harnesses. Operating directly alongside founders at C3A Labs to engineer the core execution layer for enterprise B2B agent deployments—translating complex client workflows into deterministic DAGs, managing token economics through hybrid inference cascades, and enforcing zero-drift quality guardrails. Combines full-stack engineering velocity with practical cybersecurity threat modeling and a proven track record of shipping 0-to-1 products for venture-backed and enterprise stakeholders.

PROFESSIONAL SYSTEMS & OPERATING EXPERIENCE

C3A Labs — Strategic Analyst & AI Systems Operator

Jul 2024 – Present | Remote (USA & India)

Enterprise B2B AI Agents Platform & Workflow Engine (SARVAX)

- **Multi-Agent DAG Orchestration:** Architected and evaluated autonomous execution pipelines for SARVAX, managing task flows across 12 domain agents with deterministic human-in-the-loop approval gates (await_approval) for enterprise wealth-management pilots.
- **Dynamic Model Routing & Unit Economics:** Engineered hybrid inference cascades (pairing high-throughput ingestion models with deep reasoning LLMs), reducing enterprise inference token expenditure by ~65% while eliminating reasoning drift and context degradation.
- **Model Context Protocol (MCP) Architecture:** Built server-side MCP tool connectors, schema validation pipelines, and event listeners across enterprise CRMs, financial databases, and communication channels (Salesforce FSC, Morningstar, WealthSpectrum, Zoho).
- **Automated Evals & Quality Gates:** Designed automated evaluation harnesses and prompt regression suites to measure tool-calling reliability, structured JSON output conformity, and API latency across production model upgrades.
- **Technical Due Diligence & Forensics:** Authored institutional-grade technical due diligence, competitor reverse-engineering dossiers, and operational gap analyses for C-level leadership and client onboarding.

T-Hub Hyderabad — Entrepreneur Intern (Blitz Incubation Program)

Apr 2025 – Jun 2025 | Hyderabad, India

Early-Stage Venture Incubation & Startup Acceleration

- **Venture Product Validation:** Validated Cyber Shell threat intelligence platform with startup mentors, mapped enterprise cybersecurity user pain points, and refined defensive verification mechanics for early-stage deployment.
- **Investor & Industry Feedback:** Synthesized qualitative feedback from institutional security directors to harden attack detection algorithms and user workflow interfaces.

Lunar Pixels Studio — Technical Founder & Digital Systems Lead

Nov 2024 – Present | Pune, India

Digital Strategy, 0-to-1 Architecture & Web Development

- **Full-Stack 0-to-1 Architecture:** Founded digital studio delivering modern Next.js/React architectures, responsive frontend systems, and technical diagnostics for high-growth venture-backed founders.
- **Representation Gap Forensics:** Identified digital credibility deficits across mid-market enterprises, deploying high-performance web surfaces that translated real-world institutional credibility into customer conversion.

Conneqt Business Solutions — Customer Operations & Systems Executive

May 2024 – Jul 2024 | Pune, India

Enterprise Client Operations & SLA Governance

- **Operational Execution & SLA Governance:** Managed high-volume client workflows, investigated system exceptions, and enforced structured operational communication under strict enterprise SLAs.

EDUCATION & ACADEMIC BACKGROUND

Bachelor of Computer Applications (BCA) — Sri Balaji University, Pune (SBUP)

2023 – 2026 | Pune, India

Specialization: Cloud Computing & Cyber Security · Core Domains: Cloud Infrastructure, Ethical Hacking, Network Defense, Distributed Databases, Linux Internals & Systems Programming.

Bachelor of Business Administration (BBA) — Concurrent Degree — Amity University Online

2023 – 2026 | India

Curriculum Focus: Strategic Management, Technology Commercialization, Economics & Venture Operations.

TECHNICAL PROJECTS & SECURITY INITIATIVES

CYBER SHELL — Automated Threat Defense & Security Platform2024 – 2025 | T-Hub Hyderabad

- **Adversarial Threat Modeling:** Conducted deep research into emerging generative AI social engineering vectors, automated QR-code phishing (quishing), and malicious link redirect structures. Prototyped a real-time verification architecture to inspect suspicious URLs and sender metadata.
- **National Industry Showcase:** Presented the defensive framework at **India Mobile Congress (IMC) 2025**; received technical validation and formal commendation from enterprise cybersecurity directors.

Phishing Attack Vectors & Defense Protocols — Academic Security ProjectCompleted 2025 | Open Access Repository

- **Threat Analysis & Verification:** Analyzed automated phishing delivery mechanisms, attack surfaces, and defensive validation protocols across consumer and enterprise environments.

Real-Time Password Entropy & Strength Analyzer — Security Tooling Project2024 – 2025 | Open-Source Tool

- **Client-Side Security Analysis:** Developed an interactive security utility analyzing password entropy, pattern vulnerability heuristics, and dictionary breach risks to improve user defensive awareness.

The Love She Never Knew — Self-Published BookPublished 2025 | Global Distribution

Available on Amazon Kindle (ASIN: B0F76DLRMY), Google Play Books, Poethi

- **Long-Form Synthesis Discipline:** Independently authored and published a full-length narrative book, demonstrating sustained creative discipline, long-form narrative synthesis, and structured written communication.

LEADERSHIP, GOVERNANCE & ECOSYSTEM INVOLVEMENT

President — Student Development Cell (SDC), School of Computer Studies, SBUPAY 2025 – 2026 | Pune, India

- Directed student engineering teams, coordinated university technical workshops and hackathons, and managed structured collaboration between university leadership, industry keynote speakers, and 600+ students.

Core Member — SRUJAN EDIC, Innovation & Entrepreneurship Cell, SBUPAY 2024 – 2026 | Pune, India

- Organized university startup pitch competitions, founder masterclasses, and entrepreneurial workshops connecting student founders with early-stage venture mentors.

TECHNICAL CAPABILITIES & INFRASTRUCTURE MATRIX

AI & MULTI-AGENT SYSTEMS:	Multi-Agent DAG Workflows, Model Context Protocol (MCP), Prompt Governance, Automated LLM Evals, RAG Retrieval Pipelines, Subagent Delegation, Token Unit Economics.
MODELS & INFERENCE RUNTIMES:	Frontier LLM Benchmarking (Claude 3.7, GPT-4o, Gemini 3.7 Flash, DeepSeek V4, Qwen), Local Inference (Ollama, Apple Silicon MLX, CosyVoice / Qwen-TTS), Multimodal Vision APIs.
PROGRAMMING & WEB STACK:	Python (Advanced / Production), TypeScript, JavaScript, Next.js 14 / React, HTML5/CSS3, SQL, PostgreSQL, SQLite, REST APIs, JSON-Schema, Git / GitHub CI/CD.
SYSTEMS, CLOUD & SECURITY:	Linux Environments (macOS / Ubuntu / Kali), Cloud Infrastructure (AWS Bedrock, GCP), Wireshark, Burp Suite, Nmap, Metasploit, Threat Vector Modeling, Zero-Trust Architecture.
DESIGN & MEDIA TOOLING:	Figma, Adobe Photoshop, Canva, DaVinci Resolve, Web UI/UX Prototyping.
LANGUAGE PROFICIENCIES:	English (Fluent / Professional Working Proficiency), Hindi (Native), Marathi (Fluent), Japanese (Beginner · Pursuing JLPT N3 / UTRIP 2026 Track).

HONORS, CERTIFICATIONS & RECOGNITION

- **India Mobile Congress (IMC) 2025:** Technical Presentation Recognition for Cyber Shell digital threat defense research.
- **T-Hub Hyderabad:** Blitz Incubation & Startup Acceleration Program Completion Certificate.
- **ANZ Cybersecurity Program:** Enterprise Threat Modeling, Risk Identification & Infrastructure Defense Certificate.
